

NEIGHBORHOOD DROP-IN SESSION

Longfellow Creek and 24th Ave SW

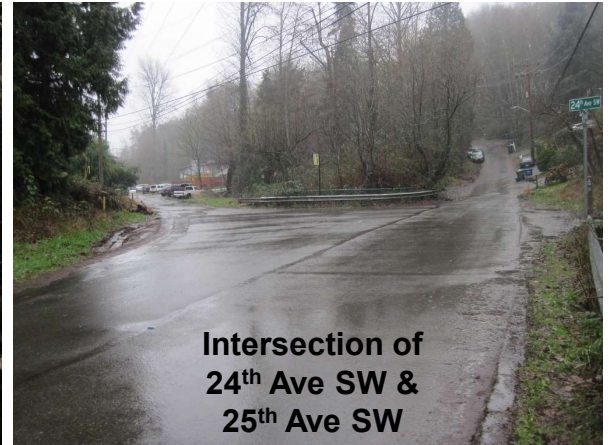

Flood Reduction & Trail Connection Project

Saturday, November 17 | 12:30 p.m. – 3:30 p.m.

On 24th Ave SW – LOOK FOR US UNDER THE TENTS

24th Ave SW

Intersection of
24th Ave SW &
25th Ave SW

Join us to see preliminary design concepts and share your thoughts!

Based on input from the community and city agencies, preliminary design concepts have been developed to reduce flooding and improve trail connections along Longfellow Creek from SW Willow St to SW Graham St.

Stop by our tent anytime from 12:30 – 3:30 to:

- See design concepts for the street, intersection, creek and trail corridors
- Ask questions and talk to the project team
- Share your thoughts on the design concepts
- Warm up with a cup of hot chocolate and talk to neighbors

About the project

Neighbors on 24th Ave SW and the non-profit organization Mid Sound Fisheries Enhancement Group were awarded grant funding to address flooding issues, redesign the street corridor and improve Longfellow Legacy Trail Connections.

Over recent months, the project team has met with community members and partner agencies to begin developing preliminary design concepts. Following this drop-in session, the team will continue to work with the community to refine the design. A final design concept will be presented in early 2019.

The team will work to incorporate the needs of the community while balancing the requirements of permitting agencies into the proposed final design concept. The community will be engaged through one-on-one meetings, emails, phone calls, and community meetings throughout the design process.

For more information contact project manager Paul Schlenger at 206-601-1405 or pschlenger@esassoc.com
